Citrus Pre Wash

Waxedshine Citrus pre wash is a citrus based cleaner for use in both a foam cannon and pump sprayer. To wash a vehicle correctly, using a prewash as the first step is a must to help reduce swirl marks, scratches and abrasion to the surface. Waxedshine citrus pre wash has been formulated to help lift road grime, bug splatter and other forms of dirt by utilizing foaming agents and active cleaning ingredients

DILUTION:

Foam Cannon - 100ml to 900ml water
Pump Sprayer - 50ml to 100ml per 1L

SIZES: 16oz/473ml, 1 Gal/3.78L

16oz concentrate

Wash Shampoo

Waxedshine Wash is a pH neutral shampoo containing no silicone, waxes or polymers. The technology allows the product to be safe on waxed, paint sealants and ceramic coated vehicles, along with matte finish paintwork, vinyl wraps and PPF. Wash can be used in a bucket, foam cannon or a foam pump sprayer.

DILUTION:

Foam Cannon - 100ml to 900ml water
Pump Sprayer - 50ml to 100ml per 1L
Bucket - 2 - 4oz per 5 Gal

SIZES: 16oz/473ml, 1 Gal/3.78L

WS-SIL-1GAL

Silica Soap

Waxedshine Silica Soap is formulated to clean vehicles that have been ceramic coated. Silica Soap utilizes Sio2 technology which restores the hydrophobic properties while providing good lubricity to allow for a safer wash of the vehicle leaving behind a layer of Sio2 protection.

DILUTION:

Foam Cannon - 100ml to 900ml water
Pump Sprayer - 50ml to 100ml per 1L
Bucket - 2 - 4oz per 5 Gal

SIZES: 16oz/473ml, 1 Gal/3.78L

APC+D

Waxedshine APC+D is a multi-purpose citrus based formulation that works on wheels, interiors, exteriors, engines, leather, carpets and more. APC+D now combines a true all purpose cleaner and the technologies behind a degreaser to make a 2 in 1 product. Containing d'limonene, APC+D has enough cut to remove stubborn grease and stains yet is stabilized in a formulation that is safe to use on fabrics and other soft surfaces.

Ready to use (RTU) and concentrate versions are available: Starting at 10:1 dilution

SIZES: 16oz/473ml, 1 Gal/3.78L

WS-GLA-16
 1 gallon concentrate
WS-GLAC-1GAL

Glass Cleaner

Waxedshine Glass Cleaner is a ready to use easy on and off formula. Glass Cleaner is an ammonia free formula making it safe on window tint, dash gauges and interior/exterior clear plastics. Glass Cleaner will remove tobacco stains, ingrained grime, bugs, tar and more leaving a slick, streak free finish.

Ready to use (RTU) and concentrate versions are available: Up to 5:1 dilution

SIZES: 16oz/473ml, 1 Gal/3.78L

Clay Mitt (ultra fine)

Waxedshine Citrus pre wash is a citrus based cleaner for use in both a foam cannon and pump sprayer. To wash a vehicle correctly, using a prewash as the first step is a must to help reduce swirl marks, scratches and abrasion to the surface. Waxedshine citrus pre wash has been formulated to help lift road grime, bug splatter and other forms of dirt by utilizing foaming agents and active cleaning ingredients

Clay bar (fine grade)

Waxedshine Wash is a pH neutral shampoo containing no silicone, waxes or polymers. The technology allows the product to be safe on waxed, paint sealants and ceramic coated vehicles, along with matte finish paintwork, vinyl wraps and PPF. Wash can be used in a bucket, foam cannon or a foam pump sprayer.

Clay bar (firm grade)

Waxedshine Silica Soap is formulated to clean vehicles that have been ceramic coated. Silica Soap utilizes Sio2 technology which restores the hydrophobic properties while providing good lubricity to allow for a safer wash of the vehicle leaving behind a layer of Sio2 protection.

WS-CUT-1GAL

Cut Compound

Cut Compound is a modern waterbased formula enabling fast paint leveling. Cut Compound is designed utilizing nano abrasive technology to remove P1000+ sanding marks and finer defects depending on the pad choice. Cut Compound uses a superior formulation providing a high gloss, haze free finish with easy clean-up and very little swirling. Cut Compound is body shop safe and VOC compliant.

Compatible with Rotary and Da Polishers, wool, microfiber and foam pads.

8oz/250ml, 1 Gal/3.78L

8oz or 16oz

WS-ONE-16

1 gallon

WS-ONE-1GAL

One Hybrid

ONE Hybrid is both a correction compound and a polish that finishes down to a high gloss. Created using a waterbased formulation, multiple types of innovative nano abrasives, ONE Hybrid can be used by hand in areas that a machine cannot access. ONE Hybrid offers a quick cut and a gloss that enables it to be a "ONE STEP" correction system prior to adding protecting the surface.

Compatible with Rotary and DA Polishers, wool, microfiber and foam pads.

8oz/250ml, 1 Gal/3.78L

8oz or 16oz

WS-FIN-16

1 gallon

WS-FIN-1GAL

Fine Polish

Waxedshine Fine Polish is an easy to use, durable formulation that adds hydrophobic properties and protection to your vehicle. Utilizing silica (SiO₂), Fine Polish creates a great bond to apply your ceramic coating to. Fine polish works great on top of a cured coating to boost hydrophobic effects and also as a standalone sealant. The big advantage is Fine Polish can be applied before a ceramic coating or as a coating topper to boost the properties and coating characteristics along with being able to correct minor scratches.

WS-IRO-1GAL

Iron Off

Iron Off is formulated to remove iron and fallout contamination. Ferrous deposits can cause surface corrosion along with brake dust causing damage if not removed in a timely manner. Iron Off is safe and effective on automotive paint and most wheel types and changes color as it breaks down the deposits on the surface.

* Not safe to use on bare metals or ceramic brakes.

WS-PAN-1GAL

Panel Cleaner

Panel Cleaner is an alternate surface cleaner made to remove residual polishing oils, lubricants, surface debris, polishing dust etc. Panel Cleaner can be used on all hard surfaces to ensure a maximum bond is achieved with your choice of protection. Panel Cleaner is a fast flashing formulation that will cut through grease and surface oils leaving behind a clean surface that is safe to coat, wax or protect.

Panel Cleaner is also capable of removing polishing fillers and surface residue along with working as an exterior spot cleaner for traffic film debris and stubborn road grime.

Envo QD+

Waxedshine Envo QD+ is designed to clean, lubricate, seal, shine and protect paintwork. Using advanced body shop safe hydrophobic polymer technology, Envo QD+ is more than just a quick detailer. With advanced cleansing abilities, Envo QD+ cleans, lubricates, repels water, enhances the shine and adds additional protection to the finish. Envo QD+ will not leave any white residue on rubber or plastic surfaces. Safe on paint, rims, exterior glass, plastics, rubber trim and more.

Ready to use (RTU) and concentrate versions are available: Up to 7:1 dilution

SIZES: 16oz/473ml, 1 Gal/3.78L

PADS

WS-WOOL-5

Wool Pad

Waxedshine wool pads utilize a dual blend of wool fibers to create a great fast cut process. The incorporated heat barrier in between the velcro and foam interface allows for longevity and better heat dispersion. Suitable for both rotary and DA Polishers. Waxedshine wool pads work great with both Cut Compound and ONE Hybrid.

Available in both 3" and 5" sizes.

Microfiber Pad

Waxedshine microfiber pads are a great cut and polish pad for a 2 in 1 result. The red microfiber is a dense fiber that really gets the job done fast. We have incorporated a heat barrier in between the velcro and foam interface allowing for better longevity and better heat dispersion generated from the machine polisher. Suitable for both rotary and DA Polishers.

Available in both 3" and 5" sizes.

Heavy Cut Pad

Waxedshine Heavy Cut foam pad utilizes an open cell foam technology to achieve a quick cut. Waxedshine foam pads have an incorporated heat barrier to allow for better longevity and heat dispersion generated from the polisher. The bevelled edge allows for closer correction into the edges that are usually difficult to get to with a traditional pad.

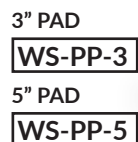

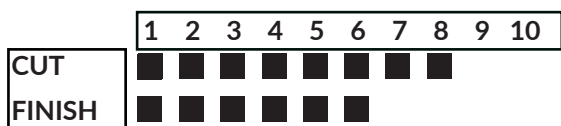

Available in both 3" and 5" sizes.

CUT	■	■	■	■	■	■	■	■	■	■
FINISH	■	■	■	■						

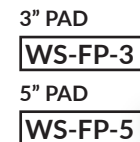

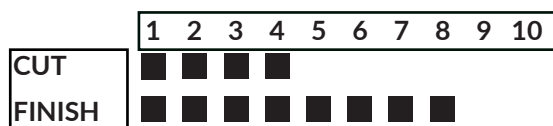

Waxedshine cutting pad utilizes a partially open cell foam to enable a cut while achieving a great polish and finishing result. The foam softens when heat is generated which allows the compound or polish to finish out reducing marring or holograms. The bevelled edge allows for closer correction into edges that are usually difficult to get to with a traditional pad.

Available in both 3" and 5" sizes.

Waxedshine polishing pad utilizes a closed cell foam technology generating a great polished and finished result. The foam softens when heat is generated allowing the polish to finish out reducing marring or holograms, leaving a great finish. The bevelled edge allows for closer correction into edges that are usually difficult to get to with a traditional pad.

Available in both 3" and 5" sizes.

Waxedshine finishing pad utilizes a specialized foam technology to achieve a fantastic high gloss finish. The foam articulates to heat and softens when heat is generated allowing the polish to finish out leaving behind a mirror like finish. The bevelled edge allows for closer correction into edges that are usually difficult to get to with a traditional pad.

Available in both 3" and 5" sizes.

Aquabead

Aquabead is a revolutionary silica based sealant that utilizes a proprietary blend of polysiloxane ingredients that creates a both spray on/rinse off, or wipe on wipe off protection product. When sprayed on and rinsed off, Aquabead will turn the surface extremely glossy as the formula starts activating to the water. Utilizing polysiloxane, Aquabead cures over a 24 hour period at which point the surface will become extremely glossy and hydrophobic.
