# CAR DETAILING PRODUCTS MADE WITH THE HIGHEST GRADE INGREDIENTS

## Intro

Waxedshine is a family owned business, located in Arizona USA. Between the father and two son duo there is over 70 years experience in the Automotive sector. Originally from the UK, Mark, Alex and Scott moved to North America around 19 years ago. Waxedshine was created around 9 years ago with initial focus on North America and local markets. Fast track to today and Waxedshine has grown to a great network of installers and distributors spread across 48 countries and growing. The key focus is on tailoring high quality products, formulating with the highest grade raw ingredients to ultimately have something that stands up and above the rest. The range of products are developed with the mindset of "less is more". This statement falls true to not having too many of the same category product but also to how we setup our installers. We ensure you have a dedicated radius so you are successful and have room to grow.

# 1. CLEAN

## CITRUS PRE WASH

Waxedshine Citrus Pre Wash is a citrus based cleaner for use in both a foam cannon and pump sprayer. To wash a vehicle correctly, using a pre wash as the first step is a must to help keep the infliction of swirl marks, scratches and abrasions to a minimum.

Waxedshine Citrus Pre Wash has been formulated to help lift road grime, bug splatter and other forms of dirt utilizing foaming agents and active cleaning ingredients.

Product	Size
WS-CPW-16	16oz / 500ml
WS-CPW-1GAL	1 Gallon

## WAXEDSHINE WASH

Waxedshine Wash is a pH balanced 300:1 shampoo containing no silicone, waxes or polymers, blended using soft surfactants that make it safe for surfaces that are waxed, sealed, ceramic coated as well as matte paintwork, vinyl wrap and PPF. Whether you are using Waxedshine coatings or another brand, Waxedshine Wash will be safe to use as your maintenance wash shampoo.

The formulation can be used as a traditional 2 bucket wash, in a foam cannon or in a foaming pump sprayer.

Product	Size
WS-WASH-16	16oz / 500ml
WS-WASH-1GAL	1 Gallon

## SILICA SOAP

Waxedshine Silica Soap is formulated to clean vehicles that have been coated with a ceramic coating. Silica Soap utilizes Sio2 technology which restores the hydrophobic properties while providing good lubricity to allow for a safer wash of the vehicle leaving behind a layer of Sio2 protection.

Waxedshine Silica Soap is a pH neutral concentrate formulation that is safe to use on waxes, sealants and coatings as well as on vehicles with no coating applied to help add protection leaving behind a SiO2 barrier.

Product	Size
WS-SS-16	16oz / 500ml
WS-SS-1GAL	1 Gallon

## APC+D

Waxedshine APC+D is a multi-purpose citrus based formulation that works on wheels, interiors, exteriors, engines, leather, carpets and more. APC+D now combines a true all purpose cleaner and the technologies behind a degreaser to make a 2 in 1 product. Containing d'limonene, APC+D has enough cut to remove stubborn grease and stains yet is stabilized in a formulation that is safe to use on fabrics and other soft surfaces. APC+D will be the product you want by your side to clean a surface when you need that go to cleaner.

Product	Size
WS-APC-16	16oz / 500ml
WS-APCC-16	16oz / 500ml
WS-APC-1GAL	1 Gallon

## WHEEL + TIRE

Waxedshine Wheel + Tire is formulated to work on a variety of rims such as chrome, plastic, painted, aluminum and more. Formulated to be safe and fast acting, Wheel + Tire helps break down brake dust, road grime, oil and surface dirt. Wheel + Tire is great at removing the old tire shine and grime from the tires leaving behind a clean, ready to protect tire. Another area to use Wheel + Tire is on the rubber trims to remove dirt and oxidation as well as under the wheel arches.

Product	Size
WS-WAT-16	16oz / 500ml
WS-WATC-16	16oz / 500ml
WS-WATC-1GAL	1 Gallon

## GLASS CLEANER

Waxedshine Glass Cleaner is a ready to use easy on and off formula. Glass Cleaner is a ammonia free formula making it safe on window tint, dash gauges and interior/ exterior clear plastics. Glass Cleaner will remove tobacco stains, ingrained grime, bugs, tar and more leaving a slick, streak free finish.

Product	Size
WS-GLA-16	16oz / 500ml
WS-GLAC-1GAL	1 Gallon

# 1. CLEAN

## WASH MITT

Waxedshine Ultra Plush Wash mitt is a soft microfiber construction with a inner foam that creates a great contour feel when washing a vehicle. The fibers used are extremely soft and safe for all types of clearcoat and gelcoat.

The wash mitt features a comfortable cuff that is elasticated against your arm. Safe to use on ceramic coated vehicles.

Product Code
WS-WASH-MITT

## DETAILING BRUSH SET

Waxedshine detailing brushes are metal free and utilize ultra soft bristles. Perfect for using on the interior, exterior emblems and other areas that could easily scratch. Here are some key benefits:

- Ergonomically designed handle
- Textured grip area for stability
- Balanced at grip area to minimize user fatigue
- Chemical resistant handle + soft synthetic bristles.
- Metal free construction to help prevent any scratching.

Product Code
WS-BRUSH-KIT

## REFINE TOWEL

The Refine Towel utilizes laser cut edges, allowing it to work fantastic as an all rounder. These towels never fail wash after wash and should be in any car enthusiasts arsenal. Great for coating levelling, compound, polish and wax removal and glass cleaning.

- Made in Korea
- High quality weaved fibers
- 350gsm
- Edgeless

Product	Size	Weight
WS-REFINE	16" x 16"	350gsm

## EDGELESS DUO

The Edgeless Duo Towel has been created to have both a short pile fiber on one side and a long pile on the other. The towel works great for coatings that require 2 wipes as well as a good final paintwork finishing towel.

- Made in Korea
- High quality fibers
- 400gsm
- Edgeless

Product	Size	Weight
WS-DUO	16" x 16"	400gsm

## FINISH TOWEL

The Super Soft Finish towel has to be some of the softest fibers we have felt to date. These towels are lint free, edgeless, ultra soft, easy to work with and amazing on all types of paintwork including super soft clear coats. Whether you are removing waxes, sealants, polishes or coatings, the Super Soft towel has you covered leaving perfect results.

- Made in Korea
- 400GSM ultra soft pile
- Edgeless
- Lint free

WAXEDSHINE

# 1. CLEAN

**CLAY MITT (ULTRA FINE)**

Waxedshine Clay Mitt is a ultra fine synthetic surface specially designed to be gentle on your clearcoat while removing contaminants. The Mitt acts like a glove and lasts 4 times longer than a traditional clay bar. The surface is washable and unlike traditional clay bars can be rinsed and reused. Envo QD+ is a great product to use as a clay lubricant.

Product	Size
WS-CLAY-MITT	21 x 14 cm

**CLAY BAR (FINE)**

Waxedshine Fine Grade Clay Bar utilizes German clay technology for the best quality results. Each clay bar is 100g and comes in a reusable storage box to keep it safe. The Fine Grade composition is best for new and lightly contaminated vehicles.

- Remove contaminants
- Remove paint overspray
- Safe on clearcoat, glass and chrome surfaces
- Includes storage case

Product
WS-CLAY-FINE

**CLAY BAR (FIRM)**

Waxedshine Firm Grade Clay Bar utilizes German clay technology for the best quality results. Each clay bar is 100g and comes in a reusable storage box to keep it safe. The Firm Grade composition is designed to remove heavy contamination for clearcoat, glass and chrome surfaces.

- Remove contaminants
- Remove paint overspray
- Safe on clearcoat, glass and chrome surfaces
- Includes storage case

Product
WS-CLAY-FIRM

# 2. PREPARE

WAXEDSHINE

- Cut Compound
- One Hybrid
- Prime Polish

WAXEDSHINE

## 2. PREPARE

CUT COMPOUND

Cut Compound is a modern waterbased formula enabling fast paint leveling. Cut Compound is designed utilizing nano abrasive technology to remove P1000+ sanding marks and finer defects depending on the pad choice. Cut Compound uses a superior formulation providing a high gloss, haze free finish with easy clean-up and very little swirling. Cut Compound is body shop safe and VOC compliant.

Compatible with Rotary and Da Polishers, wool, microfiber and foam pads.

Product	Size
WS-CUT-16	16oz / 500ml

ONE HYBRID

ONE Hybrid is both a correction compound and a polish that finishes down to a high gloss. ONE Hybrid is Created using a waterbased formulation and multiple types of innovative nano abrasives. Due to its formulation you can also use ONE Hybrid by hand in areas that a machine cannot access. ONE Hybrid offers a quick cut and a gloss that enables it to be a “one step” correction system.

Compatible with Rotary and DA Polishers, wool, microfiber and foam pads.

Product	Size
WS-ONE-16	16oz / 500ml

PRIME POLISH

Waxedshine Prime Polish is an easy to use, durable formulation that adds hydrophobic properties and protection to your vehicle. Utilizing silica (SiO2), Prime Polish creates a great bond to apply your ceramic coating to, it works great on top of a cured coating to boost hydrophobic effects and also as a standalone sealant. The big advantage is Prime Polish can be applied before a ceramic coating or as a coating topper to boost the properties and coating’s characteristics and correct minor scratches.

Product	Size
WS-POL-16	16oz / 500ml

IRON OFF

Iron Off is formulated to remove iron and fallout contamination. Ferrous deposits can cause surface corrosion along with brake dust causing damage if not removed in a timely manner. Iron Off is safe and effective on automotive paint and most wheel types and changes color as it brakes down the deposits on the surface.

\* Not safe to use on bare metals or ceramic brakes.

Product	Size
WS-IRO-16	16oz / 500ml
WS-IRO-1GAL	1 Gallon

PANEL CLEANER

Panel Cleaner is an alternate surface cleaner made to remove residual polishing oils, lubricants, surface debris, polishing dust etc. Panel Cleaner can be used on all hard surfaces to ensure a maximum bond is achieved with your choice of protection. Panel Cleaner is a fast flashing formulation that will cut through grease and surface oils leaving behind a clean surface that is safe to coat, wax or protect. Panel Cleaner is also capable of removing polishing fillers and surface residue along with working as a exterior spot cleaner for traffic film debris and stubborn road grime.

Product	Size
WS-PAN-16	16oz / 500ml
WS-PAN-1GAL	1 Gallon

ENVO QD+

Waxedshine Envo QD+ is designed to clean, lubricate, seal, shine and protect paintwork. Using advanced body shop safe hydrophobic polymer technology, Envo QD+ is more than just a quick detailer. With advanced cleansing abilities, Envo QD+ cleans, lubricates, repels water, enhances the shine and adds additional protection to the finish. Envo QD+ will not leave any white residue on rubber or plastic surfaces. Safe on paint, rims, exterior glass, plastics, rubber trim and more.

WOOL PAD

Waxedshine wool pads utilize a dual blend of wool fibers to create a great fast cut process. The incorporated heat barrier in between the velcro and foam interface allows for longevity and better heat dispersion. Suitable for both rotary and DA Polishers. Waxedshine wool pads work great with both Cut Compound and ONE Hybrid.

Available in both 3” and 5” sizes.

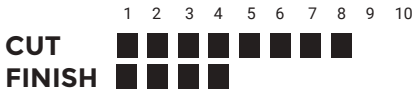

Product	Size
WS-WOOL3	3” PAD
WS-WOOL5	5” PAD

MICROFIBER PAD

Waxedshine microfiber pads are a great cut and polish pad for a 2 in 1 result. The red microfiber is a dense fiber that really gets the job done fast. We have incorporated a heat barrier in between the velcro and foam interface allowing for better longevity and better heat dispersion generated from the machine polisher. . Suitable for both rotary and DA Polishers.

Available in both 3” and 5” sizes.

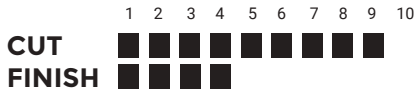

Product	Size
WS-MF3	3” PAD
WS-MF5	5” PAD

HEAVY CUT PAD

Waxedshine heavy cut foam pad utilizes a open cell foam technology to achieve a quick cut. The foam articulates to heat and softens when heat is generated allowing the compound or polish to finish out reducing marring or holograms. Each Waxedshine foam pad uses a EVA hard backing to create better control while still being able to flex and contour to panels. The bevelled edge allows for closer correction into the edges that are usually difficult to get to with a traditional pad.

Available in both 3” and 5” sizes.

Product	Size
WS-HC3	3” PAD
WS-HC5	5” PAD

## 2. PREPARE

CUTTING PAD

Waxedshine cutting foam pad utilizes a partial open cell foam to enable a cut while achieving a great polish and finishing result. The foam articulates to heat and softens when heat is generated allowing the compound or polish to finish out reducing marring or holograms. Each Waxedshine foam pad uses a EVA hard backing to get better control while still being able to flex and contour to panels. The bevelled edge allows for closer correction into edges that are usually difficult to get to with a traditional pad.

Available in both 3” and 5” sizes.

Product	Size
WS-CT3	3” PAD
WS-CT5	5” PAD

POLISHING PAD

Waxedshine polishing foam pad utilizes a closed cell foam technology to enable for a great polished and finished result. The foam articulates to heat and softens when heat is generated allowing the polish to finish out reducing marring or holograms, leaving a great finish. Each Waxedshine foam pad uses a EVA hard backing to get better control while still being able to flex and contour to panels. The bevelled edge allows for closer correction into edges that are usually difficult to get to with a traditional pad.

Available in both 3” and 5” sizes.

Product	Size
WS-PP3	3” PAD
WS-PP5	5” PAD

FINISHING PAD

Waxedshine finishing foam pad utilizes a very special foam technology to achieve a fantastic high gloss finish. The foam articulates to heat and softens when heat is generated allowing the polish to finish out leaving behind a mirror like finish. Each Waxedshine foam pad uses a EVA hard backing to get better control while still being able to flex and contour to panels. The bevelled edge allows for closer correction into edges that are usually difficult to get to with a traditional pad.

Available in both 3” and 5” sizes.

WS-FP3	3” PAD
WS-FP5	5” PAD

# 3. PROTECT

WAXEDSHINE

- Aquabead
- Leather Nourish
- Fabric Guard
- Tire Shine
- Dress All

### 3. PROTECT

#### AQUABEAD

Aquabead is a silica based sealant that utilizes a proprietary blend of polysiloxane ingredients, creating both a spray on/rinse off, or wipe on/wipe off protection. When sprayed on/rinsed off, Aquabead will turn the surface extremely glossy as the formula starts activating to the water. Aquabead cures over 24 hours at which point the surface will become extremely glossy and hydrophobic. Aquabead can be used as a standalone protection or as a maintenance for ceramic coatings, boosting hydrophobic properties, UV protection and chemical resistance. Safe on all exterior surfaces.

Product	Size
WS-AQB-16	16oz / 500ml
WS-AQBC-16	16oz / 500ml
WS-AQBC-1GAL	1 Gallon

#### LEATHER NOURISH

Waxedshine Leather Nourish and vinyl conditioner restores and adds the natural oils needed to condition new and old leather surfaces. Leather Nourish protects against fading and cracking seen from neglected leather, leaving behind a non-greasy natural finish. Waxedshine Leather Nourish is a cosmetic grade formulation as leather is a skin, why not protect it the same.

Product	Size
WS-LEA-16	16oz / 500ml
WS-LEA-1GAL	1 Gallon

#### FABRIC GUARD

Waxedshine Fabric Guard has been developed to leave a protective layer on both fabric and carpets, repelling water and oils. Fabric Guard is safe on all types of fabrics and fibers including delicate materials such as silk. Fabric Guard is easy to use and works in cars, boats, around the home and on clothing. Fabric Guard can be used with a trigger sprayer or in a pump sprayer to create a fine, even mist.

Product	Size
WS-FAB-16	16oz / 500ml
WS-FAB-1GAL	1 Gallon

### 3. PROTECT

#### TIRE SHINE

Waxedshine Tire Shine is a waterbased formula that utilizes innovative ingredients to create a durable finish. Tire Shine gives a great high gloss shine and works on exterior unpainted plastics. Tire Shine contains UV protection and waterproofing ingredients technology to help increase the products look and performance on the tire or surface.

Product	Size
WS-TRS-16	16oz / 500ml
WS-TRS-1GAL	1 Gallon

#### DRESS ALL

Waxedshine Dress All works on interior, exterior and engine plastics to enhance the surface to either a gloss or satin finish (if diluted down). Dress All restores shine and luster to vinyl, plastic, leather and rubber surfaces, in and out the vehicle while adding a UV protective layer. Waxedshine Dress All can be used neat or diluted as necessary if you want a satin finish.

Product	Size
WS-DRE-16	16oz / 500ml
WS-DRE-1GAL	1 Gallon

# 4. COATINGS

WAXEDSHINE

- GSHC Self Healing
- PPS Graphene
- Top Coat
- Wheel
- Glass

### 3. PROTECT

Product Code	Size
WS-GSHC-50	50ml

#### GSHC SELF HEALING

GSHC is our latest revolutionary self healing coating. GSHC utilize Graphene oxide which in turn helps improve the performance all round. GSHC is a one layer, one hour cure time product providing excellent hydrophic properties, chemical resistance, UV protection and self healing that will continue to heal. Self healing starts at just 60C utilizing hot water, heat gun or outside temperature depending on your location and climate. GSHC is a certified installer coating and training is provided by a Waxedshine specialist. Application can be by hand or utilizing a HVLP sprayer which is taught in the training session

Safe to use on: Paint | Wheels | PPF | Vinyl Wraps | Metal | Plastic | Glass | Leather | Fabric

Durability (5H) (Up to 5 years)	9 / 10
Gloss	10 / 10
Hydrophobics	10 / 10
Self Healing	9 / 10
Chemical Resistance	9 / 10

Product Code	Size
WS-PPS-50	50ml

#### PPS PRO

PPS is our latest addition that utilizes a small amount of Graphene Oxide in the formulation to form a high solid coating that results in a 9H hardness, excellent gloss, easy application and multi surface use. PPS is a one product option or a base layer to Top Coat. Graphene Oxide helps create a surface that is more resistant to water spots, higher hydrophobic properties and a strong chemical resistant barrier. PPS can last up to 5 years.

Safe to use on: Paint | Wheels | Metal

Durability (9H) (Up to 5 years)	9 / 10
Gloss	8 / 10
Hydrophobics	8 / 10
Chemical Resistance	9 / 10

Product Code	Size
WS-TOP-50	50ml

#### TOP COAT

Top Coat is a fluorine and silica blend that we have combined to form Top Coat, a ultra slick and hydrophobic final layer. Top Coat can be used on various surfaces as well as a final step over various brand coatings. Maintained, Top Coat will last up to 3 years. It will also enhance your base coating adding more durability.

Safe to use on: Paint | Wheels | PPF | Vinyl Wraps | Metal | Plastics

Durability (8H) 3 years	9 / 10
Gloss	10 / 10
Hydrophobics	10 / 10
Chemical Resistance	8 / 10

### 3. PROTECT

Product Code	Size
WS-WCC-50	50ml

#### WHEEL

Wheel Coating is a highly durable, high heat resistant wheel and caliper protection system that is easy to apply. Once applied, Wheel Coating will create a hard chemical resistant layer that provides UV protection, resistance to brake dust and easier cleaning.

Safe to use on: Wheels | Metal | Exhaust tips | Raw aluminum | brake calipers | chromes

Durability (7H)	8 / 10
Gloss	9 / 10
Hydrophobics	8 / 10
Chemical Resistance	8 / 10

Product Code	Size
WS-GC-50	50ml

#### GLASS

Waxedshine Glass Coating is a nano based ceramic coating for all exterior glass surfaces including the windshield. Glass Coating is formulated to repel water and reduce the chance of water spots. When applied on the windshield, Glass Coating is wiper safe and will withstand high wear. The results create safer driving conditions when driving in the rain, making the water bead off the surface. Glass Coating will help when defrosting glass as well as aid in repelling dirt.

Safe to use on: Windshield | Glass | Headlights | Tail lights

Durability (7H)	8 / 10
Gloss	9 / 10
Hydrophobics	8 / 10
Chemical Resistance	8 / 10

#### APPLICATORS

Suede applicators, made in korea. Ultra soft and safe for all clearcoat types. Applicator block, compatible with the suede applicators. Has a foam lining to help contour when installing a ceramic coating.

Applicator and suede per kit
------------------------------

A close-up, artistic photograph of a car's front end. A bright red light bar is mounted on the grille, glowing with a warm orange-red light. The car's body panels are a vibrant, glossy green. The background is dark and out of focus, showing some blurred lights. The overall mood is high-tech and innovative.

**WE ALWAYS WANT TO PUSH THE BOUNDARIES  
WITH FRESH, NEW AND INNOVATIVE IDEAS**
